**PANARAY**®

A William O'Neil + Company Service

International Delayed Price and Volume for Germany, Japan, and Singapore

Price and volume data will be delayed 20 minutes and will update on the Datagraph upon refresh. Both List and Symbol Alerts will also utilize delayed price and volume data to trigger notifications.

Custom Calcs

- Allows users to create their own metrics based on those in our Metric Library.
- Users can employ various functions and expressions to create complex metrics for a personalized analytical experience.
- WONDA® says: Custom calculations provide additional ways in which a user can narrow the universe of stocks in the O'Neil Database.

Key Performance Indicator Panels

- Includes industry-specific metrics based on data obtained from SEC filings.
- Indicators are captured internally by our research team and are based on data availability.
- Visually provides insight into industry group performance for each company.
